EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the change and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In Drawings, Figures 1a-1d should be designated by a legend such as—**Prior Art**—because only that which is old is illustrated. See MPEO & 608.02(g).

The applicant should submit new drawings with figures 1a-1d including Prior Art.

In claim 1, "the surface of the semiconductor substrate" should be --a surface of the semiconductor substrate-- because it lacks a clear antecedent basis.

Also, "the second doping layer **can** be diffused into" should be --the second doping layer is diffused into-- because "can" should not use in claims.

REASONS FOR ALLOWANCE

2. Claims 1-10 are allowed.

3. The following is an examiner's statement of reasons for allowance: None of the references of record teaches or suggests as cited in claim 1: forming a first doping layer on an area of the semiconductor substrate, the area including the polysilicon gate electrode; implanting dopant into first doping layer by means of a high-tilt angle pocket ion implantation; forming an insulating layer on the first doping layer by diffusing the dopant of the first doping layer into the semiconductor substrate; forming a spacer/sidewall by etching the insulating layer and the first doping layer; forming a second doping layer on the semiconductor substrate and the

polysilicon gate electrode with the spacer; forming a source/drain region on a surface of the semiconductor substrate at both sides of the polysilicon gate electrode with the spacer by conducting a thermal treatment process so that the dopant of the second doping layer is diffused into the semiconductor substrate.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

CONCLUSION

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Pan (5,672,525): Polysilicon Gate Re-oxidation in a Gas Mixture of Oxygen and Nitrogen Tri-fluoride Gas by RPT to Improve Hot Carrier Immunity.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Nhu, (571)272-1792. The examiner can normally be reached on Monday-Friday from 7:30 AM to 5:00 PM.
